

MAINTENANCE WARNING. Ensure that the tool is switched off and the plug is removed from the power socket before making any adjustments or carrying out maintenance procedures. Excessive sparking generally indicates the presence of dirt in the motor or abnormal wear on the carbon brushes. Take special care to keep the ventilation inlets/outlets free from obstruction; cleaning with a soft brush followed by a compressed air jet will usually be sufficient to ensure internal cleanliness. Regularly check and tighten fixing screws which may loosen over time. CAUTION. Water must never come into contact with the tool. Keep your machine and its cord clean. Keep the grilles near the motor clear at all times. If necessary use a soft brush to remove any accumulated dust and foreign matter. The outside of the machine can be cleaned with a damp soft cloth and mild detergent. Some maintenance products and solvents may damage the plastic parts; these include products containing benzene, trichloroethylene, chloride and ammonia. Wear eye protection when carrying out cleaning. Worn or damaged power cords must be replaced by the manufacturer, the manufacturer's agent, or an authorised service centre. Store the instruction DVD and accessories in a secure place for future use.

DE WAARSCHUWING VAN HET ONDERHOUD. Zorg altijd ervoor dat het hulpmiddel uitgeschakeld is en de stop wordt verwijderd uit de machtscontactdoos alvorens om het even welke aanpassingen of onderhoudsprocedures te maken. Sluit het hulpmiddel, het instructiehandboek en de toebehoren in een veilige plaats op. Op deze wijze zult u altijd alle informatie en delen klaar hebben te overhandigen. Houd uw machine en zijn kord schoon. Buiten de machine kan worden schoongemaakt indien nodig gebruikmaak een vochtige zachte doek met een mild detergens. Sommige onderhoudsproducten en oplasmiddelen kunnen de plastic delen beschadigen; deze omvatten producten die benzine, trichloroëthyleen, chloride en ammoniak bevatten. **VOORZICHTIGHEID.** Het water moet in contact met het hulpmiddel nooit komen. Het bovenstaande vonken wijsst over het algemeen op de aanwezigheid van vuil in de motor of abnormale slijtage van de koolborstels. Neem speciale zorg om de ventilatieinhammen/afzet van obstakel vrij te houden; schoonmaken met een zachte borstel die door een samengesorteerde luchtstraal wordt gevuld zal gewoonlijk volstaan om aanvaardbare interne netheid te verzekeren. De ogenbescherming van de slijtage wanneer het uitvoeren van het schoonmaken. Als het leveringskordet het vervangen vergt, moet de taak door de fabrikant, de agent van de fabrikant, of een erkend de dienstcentrum worden uitgevoerd om een veiligheidsgevaar te vermijden. Controleer regelmatig om te zien of zijn het even welke stof of buitenlandse kwestie de grills dichtheid van de motor en rond de trekkerschakelaar ingegaan. Gebruik een zachte borstel om het even welk geaccumuleerd stof te verwijderen. Draag veiligheidsbril om uw ogen te beschermen terwijl het schoonmaken.

AVERTISSEMENT D'ENTRETIEN. Assurez-vous toujours que l'outil est coupé et la prise est enlevée de la douille de puissance avant de faire tous les ajustements ou procédures d'entretien. Stockez l'outil, le manuel d'instruction et les accessoires dans un endroit bloqué. De cette façon vous toujours aurez toute l'information et partie prêt à remettre. Maintenez votre machine et sa corde propres. L'extérieur de la machine peut être nettoyé si il y a lieu utilisant un tissu mou humide avec un détergent doux. Quelques produits et dissolvants d'entretien peuvent endommager les pièces en plastique ; ceux-ci incluent des produits contenant le benzène, le trichloroéthylène, le chlore et l'ammoniaque. ATTENTION. L'eau doit ne jamais entrer en contact avec l'outil. L'éteignement excessif indique généralement la présence de la saleté dans le moteur ou l'usage abnormal sur les balais de charbon. Faites attention spéciale pour maintenir les admissions/sorties de ventilation exemptes de l'obstruction ; le nettoyage avec un pinceau a suivi d'un gicleur d'air comprimé sera habituellement suffisant pour assurer la propreté interne acceptable. Protection d'oeil d'usage en effectuant le nettoyage. Si la corde d'approvisionnement a besoin remplacer, la tâche doit être effectuée par le fabricant, l'agent du fabricant, ou un centre de service autorisé afin d'éviter un risque en matière de sécurité. Vérifiez régulièrement que toutes les vis de fixation sont serrées. Elles peuvent vibrer lâchement avec le temps. Vérifiez régulièrement pour voir si la n'importe quelle poussière ou corps étrangers est entrée dans les grilles près du moteur et autour du commutateur de déclenchement. Employez un pinceau pour enlever n'importe quelle poussière accumulée. Portez les verres de sûreté pour protéger vos yeux tout en nettoyant.

ADVERTENCIA DEL MANTENIMIENTO. Asegúrese siempre de que la herramienta esté apagada y el enchufe esté quitado del zócalo de energía antes de hacer cualesquier ajustes o procedimientos de mantenimiento. Almacene la herramienta, el manual de la instrucción y los accesorios en un lugar seguro. De esta manera usted tendrá toda la información y parte siempre lista para dar. Mantenga su máquina y su cuerda limpias. El exterior de la máquina se puede limpiar usando un paño suave húmedo con un detergente suave si procede. Algunos productos y solventes del mantenimiento pueden dañar las piezas plásticas; éstos incluyen los productos que contienen el benceno, el tricloroetileno, el cloruro y el amoniaco. PRECAUCIÓN. El agua debe nunca entrar en el contacto con la herramienta. El encendido excesivo indica generalmente la presencia de suciedad en el motor o el desgaste anormal en los cepillos de carbón. Frote el cuidado especial para mantener las entradas/los enchufes de la ventilación libres de la obstrucción; la limpieza con un cepillo suave seguido por un jet de aire comprimido será generalmente suficiente asegurar limpieza interna aceptable. Protección de ojo de desgaste al realizar la limpieza. Si la correa de riego del suministro debe sustituirse, la operación debe ser realizada por el proveedor del suministro, o un centro de servicio autorizado para evitar un riesgo de seguridad. Controle regularmente que todos los tornillos de la fijación son apretados. Pueden vibrar flojamente en un cierto plazo. Compruebe regularmente para ver si cualquier polvo o materia extraña ha entrado en las parillas cerca del motor y alrededor del interruptor del disparador. Utilice un cepillo suave para quitar cualquier polvo acumulado. Use las gafas de seguridad para proteger sus ojos mientras que limpia.

AVERTIMENTO DI MANUTENZIONE. Accertate sempre che l'attrezzo sia spento e la spina è rimossa dallo zoccolo di potere prima della fabbricazione delle qualsiasi registrazioni o procedure di manutenzione. Immagazzinate l'attrezzo, la manuale d'istruzione e gli accessori in un posto sicuro. In questo modo sempre avrete tutte le informazioni e parte pronta a passare. Mantenga la vostra macchina ed il relativo cavo puliti. La parte esterna della macchina può essere pulita usando un panno molle umido con un detergente delicato a richiesta. Alcuni prodotti e solventi di manutenzione possono danneggiare le parti di plastica; questi includono i prodotti che contengono il benzene, il tricloro di etilene, il cloruro e l'ammoniaca. ATTENZIONE. L'acqua deve non entrare mai in contatto con l'attrezzo. Il risciacquo eccessivo indica generalmente la presenza di sporcizia nel motore o nella sorgente anomala sulle spazzole di carbone. Prenda la cura speciale per mantenere gli ingressi/prese di ventilazione esenti dall'obstruzione; pulendo con una spazzola molle seguita da un getto dell'aria compressa sarà solitamente sufficiente per accettare la pulizia interna accettabile. Protezione degli occhi di usura quando effettuano pulizie. Se il cavo del rifornimento deve sostituire, l'operazione deve essere svolti dal fornitore, dall'agente del fornitore, o da un centro di servizio autorizzato per evitare un rischio per la sicurezza. Controlli regolarmente che tutte le viti della riparazione sono strette. Possono vibrare liberamente col passare del tempo. Controlli regolarmente per vedere se qualunque polvere o sostanza estranea abbia entrato nelle griglie vicino al motore ed intorno all'interruttore di innesci. Usi una spazzola molle per rimuovere tutta la polvere accumulata. Porti gli occhiali di protezione per proteggere i vostri occhi mentre pulendo.

INTRODUCTION Thank you for purchasing this GMC Tool. The instructions contain information necessary for safe and effective operation of this product. This product has unique features. Even if you are familiar with similar products, please read this guide and view the instructional DVD attentively to make sure you get the full benefit of all product features. Keep all instructional material close at hand and ensure all users have read, viewed and fully understand them.

DECLARATION OF CONFORMITY The Undersigned: Mr Philip Ellis **as authorised by:** GMC Declare that: **PRODUCT CODE: LSMS210 DESCRIPTION: Sliding Compound Mitre Saw Electric power: 230-240V- 50Hz 1400W CONFORMS TO THE FOLLOWING DIRECTIVES:** • Directive 2004/108/EC Electromagnetic Compatibility • Directive 2006/95/EC Low Voltage Directive • Directive 2006/42/EC Machinery Directive • Directive 2002/95/EC RoHS • EN61029-1:2009, EN61029-2-9:2002 • EN60825 1.1994+A1+A2 • EN55014-1:2006, EN55014-2:1997+A1:2001 • EN61000-3-2:2006, EN61000-3-3:1995+A1:2001+A2:2005 **THE TECHNICAL DOCUMENTATION IS KEPT BY GMC Data:** 01/01/2001

Signed by:Mr Philip Ellis,

Managing Director

SPECIFICATIONS: Voltage: 230-240V~ 50Hz Input power: 1400W No load speed: 5000 min⁻¹ Blade size: 210 dia x 30mm dia bore Number of teeth: 24 Mitre angles: 0° to 52° left & right Bevel angles: 0° to 45° left Straight cut at 0° x 0°: 200 x 60mm Mitre cut at 45° x 0°: 140 x 60mm Bevel cut at 0° x 45°: 200 x 34mm Compound miter cut at 45° x 45°: 140 x 34mm Electrical insulation: Double insulated Laser type: Class 2, mains operated Noise and Vibration Data: A-Weighted Sound Pressure: 96dB(A) A-Weighted Sound Power: 109dB(A) Uncertainty: 3dB(A) Typical Weighted Vibration: 2.73m/s² Uncertainty: 1.5m/s² The sound intensity level for the operator may exceed 85dB(A) and sound protection measures are necessary.

SAFETY RULES FOR LASERS

WARNING. Do not direct the laser light towards yourself or other persons. Reflective sheet material is unsuitable for laser use as the surface could direct the beam back at the operator. A replacement laser light assembly should only be carried out by the manufacturer or an authorised agent. Maintain the laser in accordance with the manufacturer's instruction. **CAUTION:** Failure to follow safety rules may result in flash blindness and hazardous radiation exposure. Please refer to the relevant EN standards, and EN60825 for more information on lasers.

SAFETY RULES FOR MITRE SAWS

WARNING. Before connecting a tool to a power source: • Ensure that the voltage supply is the same as that specified on the nameplate of the tool. A power source with a voltage greater than that specified for the tool can result in serious injury to the user, and damage to the tool. If in doubt, do not plug in the tool. Using a power source with a voltage less than the nameplate rating is harmful to the motor. Your tool is double insulated for additional protection against possible electrical insulation failure within the tool. • Always remove the plug from the power socket before making any adjustments or maintenance, including changing the blade. • When operating the saw, use safety equipment including safety goggles or shield, ear protection, dust mask and protective clothing including safety gloves. • Ensure that there is adequate lighting. • Ensure that guards are always in place. • Do not use the saw to cut metal or masonry. • Do not allow anyone under 18 years to operate this saw. • Ensure that the operator is adequately trained in the use, adjustment and operation of the machine, and has read and understood this manual. • Keep the area free of tripping hazards. • Report faults in the machine, including guards and saw blades, as soon as they are discovered. • Ensure that the machine is always fixed to a bench, whenever possible. • Always stand to one side when operating the saw. • Never use a cracked or distorted saw blade. • Do not use this saw to cut logs. • When cutting round wood, use clamps that prevent the workpiece from turning on both sides of the blade. • Never use your hands to remove sawdust, chips or waste close by the blade. • Use manufacturer recommended blades only which conform to EN 847-1. • Do not use blades of High Speed Steel (HSS blades). • If the table insert is damaged or worn, have it replaced by an authorised service centre. • Rags, cloths, cord and string etc should never be left around the work area. • Avoid cutting nails. Inspect the workpiece and remove all nails and other foreign objects before sawing. • Support the work properly. • Do not remove cut-offs or other parts of the workpiece from the cutting area whilst the machine is running. The saw blade is not in the rest position. • Do not attempt to fix a jammed blade before first switching off the machine and ensuring the blade is motionless. • Do not stop or start a blade with a piece of wood. Let the blade come to rest naturally. • If you are interrupted when operating the saw, complete the process and switch off before looking up. • Periodically check that all nuts, bolts and fixings are properly tightened. • Do not store materials or equipment above a machine in such a way that they could fall into it. • Always hold the saw parts that are insulated. If you accidentally cut into hidden wiring or the saw's own cable, the metal parts of the saw will become 'live'. • Switch off at the mains and remove the plug immediately. • Never saw near combustible liquids or gases. • Note the direction of rotation of the motor and the blade. • Do not lock the movable guard in the open position and always ensure that it is working properly, freely rotating and returning to completely cover the blade. • Connect the saw to a dust collection device and ensure that it is operating properly. As the operator of the saw, please ensure that you understand factors that influence exposure to dust, including the type of material to be machined, the importance of localised extraction and the proper adjustment of hoods/baffles of your dust extraction system. We recommend that you always wear a dust mask when operating this saw. • Wear gloves when handling saw blades and rough materials. • Saw blades should be carried in a holder wherever possible. • Use saw blades which are suitable for the material to be cut. • Use correctly sharpened saw blades and observe the maximum speed marked on the blade. • Take additional care when trenching (slotting). • When moving the saw to a new location, always ensure the saw is in the lock-down position and use the carrying handle to transport it to its new workstation. • Ensure that the arm is secure when beveling. • The floor area around the machine must be level, well maintained and free of loose materials. • Operators must be trained in the use, adjustment and operation of the machine. • Do not remove any cut-offs from the cutting area until the guard is fully locked in place and the blade has come to rest. • When cutting long pieces which extend well over the table width, ensure that the ends are adequately supported at the same height as the saw table top. Supports should be positioned in such a way to ensure that the workpiece does not fall to the ground once the cut has been made. A number of supports at regular intervals may be required if the workpiece is sufficiently large.

WEAR GOGGLES. WEAR EARMUFFS. WEAR A BREATHING MASK.

WARNING. The tool must be used only for its prescribed purpose. Any use other than those mentioned in this manual will be considered a case of misuse. The user and not the manufacturer shall be liable for any damage or injury resulting from cases of misuse. To use this tool properly, you must observe the safety regulations, the assembly instructions and the operating instructions to be found in the DVD. All persons who use and service the machine have to be acquainted with the DVD and informed about its potential hazards. Children must not use this tool. Children must be kept out of the work area at all times. It is also imperative that you observe the accident prevention regulations in force in your area. The same applies for general rules of occupational health and safety. The manufacturer shall not be liable for any modifications made to the tool nor for any damage resulting from such changes. Even when the tool is used as prescribed it is not possible to eliminate all residual risk factors.
