# Z'TOWER

## Product Information

Designed to be quick to install, easy to manoeuvre, and height adjustable, the **Z'TOWER** is ideal for stable and safe working indoors.

Thanks to its single-piece design, the **Z'TOWER** can be installed in as little as 2 minutes by a single user - without additional tools or fixings - to a working height of up to 3.8m, which means you can spend more time on your job and less on your setup.
