# TECHNICAL SPECIFICATION

# Sonis® Comms Mounted Ear Defenders

Sonis® Comms Mounted Ear Defender / AEB081-4C8-N00

# DESCRIPTION

Sonis® Comms is a powerful communication tool, providing group intercom and active hearing protection for safe teamwork in high-noise environments. Embedded DMC® (Dynamic Mesh Communication) technology creates an autonomous private network for seamless team communication.

The headsets are user-friendly and intuitive to operate via ergonomic buttons on the earcups, hands-free technology, the desktop configuration tool, and JSP Comms mobile app. Sonis® Comms combines comfort and design features established in the development of the Sonis® range with cutting-edge wireless technology to deliver the ultimate protection and unlimited connectivity.

# OPTIONS

Sonis® Comms Mounted Ear Defender (AEB081-4C8-N00)

Sonis® Comms Mounted Ear Defender with Bluetooth® Wireless Technology (AEB081-5C7-N00)

# SAFETY STANDARDS

EN 352-4 • EN 352-6 • EN 352-8 • EN 352-3

#### **SPECIFICATIONS**

Mounting Helmet

Criterion Level (H) >110 dB Level 10

Criterion Level (L) >110 dB Level 10

Cup Material **ABS** 

Recyclable

Yes

Battery Type

Rechargeable Li-ion, 2000mAh, 3.7V, 7.4Wh

Maximum Temperature

+55°C

BSI Kitemark

Yes

**Product Weight** 

559g

# ď×

SNR 30 dB

Criterion Level (M)

>110 dB Level 10

Range

3km (dependent on local legislation, terrain, structures, physical obstacles and number of units connected to the network/group) 800m (users can travel up to 800m from another connected headset)

Adjustable

Yes

Hygiene

Hygiene Kit

IP Rating

IP54 (Sonis® Comms is rated IP54 when in a complete assembly and worn on the user's head)

Minimum Temperature

-10°C

**JSPCheck** 

Yes

#### **FEATURES**

#### **DMC® Technology**

Sonis® Comms uses DMC® (Dynamic Mesh Communication) technology powered by Cardo to establish a wireless mesh intercom system. The dynamic and self-healing network enables teams to move around freely, and allows team members to leave and re-join the network without interrupting the group connection.

#### 100% Autonomous Network

Autonomous intercom system enables effective team communication in remote locations with no internet or mobile phone coverage.

#### **Full Duplex Communication**

Full duplex system allows all users to speak without waiting for transmissions to end, making sure no messages are lost or cut off.

#### Strength in Numbers

Each Sonis® Comms headset emits a signal, acting as a mini base station, to strengthen group connection with every member added.

# **Medium-Range Connectivity**

Teams can communicate at a range of up to 3km. Users can travel up to 800m from another headset and maintain connection. \*Range may be affected by local legislation, terrain, structures, physical obstacles and number of units connected to the network.

# **Out of Range Notification**

Sonis® Comms notifies the user when connection to the group network is lost and reconnects automatically once back in range.

# **Emergency Alerts**

Emergency alerts enable users to contact teammates for assistance hands-free from Sonis® Comms headsets.

# **Multi-Channel Comms**

Groups can use separate channels, enabling multiple teams to work and communicate independently in the same location.

# **Self Hearing**

Audio feedback allows the user to hear their own speech over background noise, for confidence in voice communications.

#### **Cellular Extension**

With the cellular extension feature, two remote groups can connect to a shared network, creating an intercom system for up to 30 users.

#### Level-Dependent

Level-dependent attenuation amplifies safe sounds, such as speech and warning signals, and attenuates high noise to produce a sound output level of 82 dB at the ear.

#### **Passive Protection**

Sonis® Comms headsets provide passive attenuation to an SNR level of 34 dB (Headband) / 30 dB (Mounted) for protection against harmful noise.

# **Two-Way Radio**

Radio connectivity and built-in PTT button allow seamless integration with PMR systems. Two-way radio sharing transmits radio communications to an intercom group.

# **Low Power Consumption**

Sonis® Comms operates with low power consumption for long battery life, offering over 9 hours continuous use with all features enabled.

#### **Voice Recognition**

The boom microphone detects and isolates speech for clear, hands-free communication. To mute, simply move the mic to the upright position.

# 'Hey Sonis'

Voice activation engine allows the user to control the headset by saying 'Hey Sonis' followed by an instruction for easy hands-free operation.

#### Compatibility

Sonis® Comms Mounted are tested and certified for use with EVO® helmets, and fully compatible with EVOGuard® visor systems for complete above-the-neck protection.

#### Adjustable Fit

The earcups can be pivoted and adjusted to obtain the perfect fit. Stainless steel arms provide even distribution of pressure for a secure fit and high levels of protection.

# **Boom Microphone**

Boom microphone is lightweight with voicerecognition software. To mute, simply move the mic to the upright position.

#### Comfort

The force exerted by the headband and pivot arms works together with the cushion surface area, providing the optimum pressure for comfort throughout extended use.

# **Ergonomic Design**

Headsets are reversible with large ergonomic buttons. Wear in either orientation for easy left- or right-handed operation, overcoming problems with limited dexterity.

#### Hygiene

Earcups, cushions, headband and adaptors are easy to wipe clean. Hygiene kits enable users to replace cushions and foam inserts using a simple click to fit system.

# **Quick Setup & Maintenance**

When switched on, Sonis® Comms automatically establishes an autonomous network connection. The JSP Configuration Tool makes it simple to set up a whole site in moments. Devices are easy to charge and keep clean, with a range of spares available to maintain the modular system.

# **Language Options**

Select language for system menus and 'Hey Sonis' voice activation engine features from a wide range of built-in options.

# **Device Settings**

Control microphone sensitivity and audio playback settings for Sonis® Comms headsets with the JSP Configuration Tool desktop app.

# **Group Manager**

Use the desktop app to manage groups, creating intercom networks that connect automatically when devices are switched on.

JSP Limited. Worsham Mill. Minster Lovell. Oxford OX29 0TA. England.

# **Simple Charging**

Sonis® Comms Lithium-Ion battery is easy to charge from PC or mains using the USB-C cable provided. Fast charging for full battery in 3h from flat.

#### **Effortless Maintenance**

Sonis® Comms headsets are effortless to maintain with modular design and a wide range of user-replaceable spares.

#### **Powerful**

Sonis® Comms is a powerful communication tool, providing group intercom and active hearing protection for safe teamwork in high-noise environments. Embedded DMC® (Dynamic Mesh Communication) technology creates an autonomous private network for seamless team communication.

#### Intuitive

The headsets are user-friendly and intuitive to operate via ergonomic buttons on the earcups, hands-free technology, the desktop configuration tool, and JSP Comms mobile app. Sonis® Comms combines comfort and design features established in the development of the Sonis® range with cutting-edge wireless technology to deliver the ultimate protection and unlimited connectivity.
