

CONCRETE BROOMS

TECHNICAL SPECIFICATIONS

Concrete brooms available in 800mm or 1000mm width with 1900mm aluminium handle. Suitable for both large surfaces and detailed edge work. Colour may vary.

BENEFITS

- Creates a non-slip textured finish on fresh concrete
- Produces a reliable anti-slip surface for outdoor applications
- Ideal for driveways, paths, patios, and general concrete finishing

HOW IT WORKS

Use the concrete broom after bull floating, once the concrete has begun to firm up, to create a uniform brushed finish. Pull the broom evenly across the surface, maintaining consistent pressure to produce straight, slip-resistant texture lines.

IMPORTANT INFORMATION:

- Clean the broom and handle after use to prevent concrete build-up and maintain safe operation
- Check handle attached securely before use

Wear appropriate PPE & avoid skin contact with wet concrete

Do not use damaged or bent components
