Ref DEWALT fixings installed into Coltman hollow core floors

Dear Sirs

I can confirm that the products described in the DEWALT fixings and anchors brochures were tested by DEWALT technicians at the Coltman manufacturing facility in Sutton Coldfield. The tests witnessed were carried out in a thorough and professional method and as a result we can recommend the use of DEWALT **non expanding fixings and XH gas fired ETA pins** in Coltman hollow core floor units.

Yours faithfully

Peter Hackett

Technical Manager, Coltman Precast Concrete Ltd.
