

EHD2000 DRY DIAMOND CORE DRILL

- Hold the drill firmly with both hands
- Do not operate machine above chest height or below waist height
- Do not use the drill working off a ladder or steps
- Ensure the side handle is firmly attached to the drill
- Ensure core bit is compatible with the material being drilled
- Ensure the core bit is in good condition (no missing segments)
- If there is any significant vibration while drilling, stop work
- Do not force the drill, let the machine do the work
- Use the faster speed gear 2 (●●) for core bits below 100mm
- Use the slower speed gear 1 (●) for larger cores 100mm and over
- Maximum core size for internal brick and block is 152mm (6")
- Use dust extraction with core bits 100mm and above

CORRECT DRILLING POSITION
