Not only usefull for camping....

EcoFlow for forces

EcoFlow for emergencies

EcoFlow and drones

Charge amateur and professional drones

Charge rescue drones

DELTA Pro & UAV

Mountain Forest Search & Rescue Light Availability

The Search and Rescue operations of Mountain forest personal are affected by the complex terrain environment, weak signal transmission and change in light, which is more likely to make team miss the best rescue time.

In a low-light environment, the flexibility of drone activities can be used, equipped with lights, which can achieve rapid lighting at night and search for people. The portability design of DELTA Pro allows search and rescue personnel to ensure power support for the equipment while traveling for search and rescue.

Charge Agro Drones

Сочетание ЭкоФлоу и ХАГ становится все привычнее 🤖

Быстрая и надежная зарядка от EcoFlow оборудования обеспечивает бесперебойную работу ХАГ XP2020 ✓

Пока дрон с одной батареей работает по урожаем, можно легко подключить другую батарейку к портативной электростанции EcoFlow и быстро получить заряд полета 🚀
