

PROGUARD Ground Mat Connectors

Product Code	Pricing Unit	Colour	Application	Material
PGMC1	Each	BLACK	Duramatt, E-Mat, Hi-Vis Ground Mat	PLASTIC
PGMC2	Each	BLACK	Duramatt, E-Mat, Hi-Vis Ground Mat	PLASTIC
PGMC3	Each	BLACK	EUROTRAK	METAL
PGMC4	EACH	STEEL	ALL MATS	METAL

Product Description:

Ground Mat Connectors are specially designed to hold mats together when laid. This increases safety by preventing them from slipping and reducing trip hazards by ensuring that they don't lift up on uneven surfaces. PGMC4 U-Pins also physically anchor the mats to the floor, further eliminating slippage.

Benefits:

- Robust Construction
- Increases security of ground mats
- Prevents ground mats from slipping

Application:

PGMC1, PGMC2, PGMC3.

As the mats are laid in situ, place the connector back plates underneath, with the threaded holes showing through the connection holes/hand holes as appropriate. When satisfied with the positioning of the mats, screw in the washers & bolts provided and tighten to join the mats together.

PGMC4

Lay the mats as required. Once satisfied with the positioning of the mats, place the legs of the U-Pins through the connection holes and push/hammer them into the ground.
