

Product: Podium Steps

With the ever-increasing emphasis on safety at work, risk assessments and the Work at Height Regulations 2005. Podium steps are now the preferred choice by safety officers to step ladders, the podium provides a safe working platform with 360-degree access to work without the need to move. Lyte Industries (Wales) Ltd. podium steps have a fully surrounding guardrail system and provide access to the deck area, through a locking gate. The Podium step meets all the requirements of the new Working at Heights Regulations when it is used at the approved heights.

The Podium Step is robustly fabricated for safe site work; it is the latest way to gain HSE approval for low-level work. Currently there is no British Standard for Podium Steps although it is made to the highest quality of UK manufacture and from British Standard approved aluminium the same used to produce Lyte Industries Tower System, which is certified to HD1004.

Please remember – a thorough risk assessment must be carried out prior to any work being undertaken at height.

The low-level work platform (LLWP) was designed with a maximum working load 150 KG
