

EAZI-ZIP DOOR

Product Code	Pricing Unit	Size	Pack Quantity	Pallet Quantity
PSQZ1	Pair	2.1m high	1	400

Product Description:

The Proguard Eazi-Zip door is ideal for creating a temporary doorway through polythene walling. Featuring a self-adhesive double zipper, the door affixes to any polythene screening to create a sealable opening. They are perfect for allowing easy access to a dust containment area.

The Eazi-Zip door can be installed in a matter of minutes by simply sticking the two zips side by side approximately 1 metre apart then use a knife to cut down the back of the screening material.

The doors are suitable for use with screening props and polythene sheeting to create a temporary screen (sold separately).

Benefits:

- 2 zips per pack to create one doorway
- Easy and quick to install
- Opens and closes from either side
- Prevents dust contamination and reduces clean up time

Application:

Simply stick the two zips side by side approximately 1 metre apart onto the screening material then use a knife to cut down the back of the zips. Ensure the zip starts from the bottom. Unzip both zips and roll the polythene up and fix with *Low Tack PVC Tape*. This will create a temporary doorway which can be opened and closed as required.
