

Rough Terrain Pallet Truck

The RTT12 Rough Terrain pallet truck is ideal for use in all applications when a conventional pallet truck would not be suitable including construction sites, farms, garden centres and industrial environments.

The Pneumatic wheels allow the truck to be operated on rough and undulating surfaces.

The forks are adjustable to allow for all sizes of pallets and can be folded back for storage.

The truck is fabricated from a heavy duty and durable steel construction with a powder coated paint finish.
