

Boat Skip

The Starke Arvid range of Boat Skips can be used for transporting material, waste and rubbish on construction sites by crane or forklift and has 4 way fork pockets at the bottom for easy handling. They can be easily picked up and emptied by the crane operator and their locking mechanism uses the skip weight to secure it when lifting and releases when it's time to empty.

Technical Specification

Article number	Capacity	Dimension (mm)							Capacity	Weight
		A	B	C	D	E	F	G		
70830	1000 l	1360	1680	1380	860	660	400	1280	2000 kg	230 kg
