

Next generation water filled barrier suitable for construction sites, traffic delineation and outdoor events.

- The 18kg recycled plastic base makes it considerably heavier than traditional water filled barriers when unfilled
- Modular system that can be adapted to any required layout
- Its low profile base allows vehicles to drive over without damaging the product
- Quick and easy to install
- Easy to transport and store – designed for compact stacking to provide low transport costs
- Can be converted to full height fencing
- Corporate customisation available
