

V-TUF[®] M

TOUGH ON DUST

LUNG SAFE DUST
VACUUM CLEANER

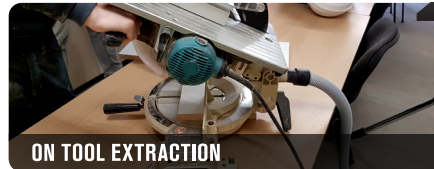

▲ COMES WITH COMPLETE ACCESSORY KIT (PAGE 2)

WHY BUY V-TUF[®] M?

PROTECT YOUR HEALTH, PROTECT YOUR VACUUM, BE COMPLIANT AND DO YOUR JOB EFFECTIVELY WITH V-TUF[®] M!

The V-TUF[®] M helps you tackle dust at the source. Connect it directly to your power tools or sweep up and enjoy a dust free environment. The V-TUF[®] M is certified to M-Class, the new 'Minimum Legal Requirement' for construction sites. Unrated vacuum cleaners are extremely dangerous as respirable dust can pass through the motor and be pumped back into the air. This dust then remains airborne for up to 8 hours, where it can be inhaled directly into your lung chamber, where it will remain forever. Approximately 700 people in the UK die every year due to illness relating to the inhalation of respirable dust. Needless to say, this dust also damages your vacuum motor. The V-TUF[®] M offers you **affordable** compliance and protection from common dust related health issues!

SELECTED FEATURES

M CLASS RATED

The V-TUF[®] M has been third party tested and certified by the UK Health and Safety Laboratory. The UK Health and Safety executive has recently introduced this rating as the minimum legal requirement for all construction sites.

99.9% FILTRATION EFFICIENCY

Unrated vacuum cleaners can exhaust up to 85% of harmful dust back into your breathing space. This dust can't be seen by the naked eye and remains airborne for up to 8 hours. The V-TUF[®] M filter protects your motor and your health!

EXTRACTION VELOCITY MONITOR

To sufficiently extract dust at source, you need a minimum extraction velocity of 20 metres per second. V-TUF[®] M will notify you if the air flow drops below this level to keep you working efficiently.

INTEGRATED FILTER SHAKER SYSTEM

V-TUF[®] M helps you to unclog the filter without exposing yourself to harmful dust by using an integrated Filter Shaker System. And if you ever need to give the filter a good, deep clean: simply remove the filter and place it in the dishwasher!

UNIVERSAL POWER TOOL CONNECTOR

V-TUF[®] M comes with a universal power tool connector enabling you to extract dust from any power tool with a collection shroud and suction port!

HANDY BLOW FEATURE

V-TUF[®] M comes with a handy blow feature. This blows pure, filtered air and can be used for a wide range of applications, such as: unblocking drains, blowing leaves or even pumping up your paddling pool!
