1. SAFETY

1.1. ELECTRICAL SAFETY

- ☐ **WARNING!** It is the user's responsibility to check the following:
- ✓ Check all electrical equipment and appliances to ensure that they are safe before using.
- ✓ Inspect power supply leads, plugs and all electrical connections for wear and damage.
- ✓ Ensure that the insulation on all cables and on the appliance is safe before connecting it to the power supply.
- ✗ **DO NOT** use worn or damaged cables, plugs or connectors.
- ✓ Ensure that any faulty item is repaired or replaced immediately by a Sealey qualified technician.
- ✓ If the cable or plug is damaged during use, switch off the electricity supply and remove from use.
- ✓ Sealey recommend that an RCD (Residual Current Device) is used with all electrical products.
- Important:** Ensure that the voltage rating on the appliance suits the mains power supply.
- ✗ **DO NOT** pull or carry the appliance by the power cable.
- ✗ **DO NOT** pull the plug from the socket by the cable.

1.2. GENERAL SAFETY

- ✓ Disconnect the gun from the mains power before changing accessories, servicing or performing other maintenance.
- ✓ Maintain the heat gun in good condition, use an authorised service agent.
- ✓ Use recommended accessories only. Unapproved accessories can be hazardous and will invalidate your warranty.
- ✓ Wear appropriate protective clothing and equipment. Work gloves and eye protection are mandatory. Protect long hair and remove loose fitting garments and jewellery. Maintain correct balance and footing and wear non-slip shoes.
- ✓ Evaluate your work area before using the heat gun. i.e. ceiling, floors and enclosures may contain flammable materials.
- ✓ Keep the work area clean, uncluttered and well lit. Use the heat gun only in a well ventilated area.
- ✓ Ensure that small or irregular shaped objects are secured in a vice or clamps before you work on them.
- ✓ Stay alert! Always pay attention to the work in hand when operating this heat gun.
- ✓ Guard against electric shock by not contacting grounded surfaces, i.e. pipes, radiators, etc. when using electric hand tools.
- ✓ Keep the heat gun handle dry, clean and free from oil and grease. Clean any paint or varnish from the nozzle after use.
- ✓ Allow the heat gun to cool before storing (only store when cold). Store the gun in a safe, dry place out of the reach of children.
- ✗ **DO NOT** direct the hot airflow at yourself, others, animals or plants and **DO NOT** allow children to operate the heat gun.
- ✗ **DO NOT** use the heat gun in rain or in a wet environment, or in areas of high humidity and damp (bathrooms, steam rooms, etc.).
- ✗ **DO NOT** obstruct the hot airflow by blocking or covering the air outlet.
- ✗ **DO NOT** touch the nozzle during, or after, use as it becomes extremely hot.
- ✗ **DO NOT** leave the heat gun running unattended. Always turn off the power supply.
- ✗ **DO NOT** use for a task it is not designed for.
- ✗ **DO NOT** use in combination with chemical strippers.
- ✗ **DO NOT** operate the heat gun when you are tired or under the influence of alcohol, drugs or intoxicating medication.
- ▲ **DANGER! DO NOT** use the heat gun as a hair dryer.
- ☐ **WARNING:** The warnings, cautions and instructions discussed in this instruction manual cannot cover all possible conditions and situations that may occur. It must be understood that common sense and caution are factors which cannot be built into this product, but must be applied by the operator.

1.2. LEAD PAINT WARNING

- 1.2.1. Paint once contained lead as a traditional ingredient. Paint particles, resulting from the removal of such paint, are toxic and ingestion/inhalation must, therefore, be avoided. The following action must be taken before using this tool:
- 1.2.2. The operator must determine potential hazard relating to age of paint to be removed (modern paints do not have lead content).
 - ▲ **DANGER!** Keep all persons and pets away from the work area. The following are particularly vulnerable to the effects of lead paint dust: Expectant women, babies and children.
- 1.2.3. We recommend personal protection by using the following safety items: Paint Spray Respirator (Sealey ref. SSP1699), PE Coated Hooded Coverall (Sealey ref. SSP267), Latex Gloves (Sealey ref. SSP24).
- 1.2.4. Take adequate measures to contain the paint dust, flakes, and scrapings.
- 1.2.5. When task is complete continue to wear safety equipment and thoroughly clean all areas. Ensure paint waste is disposed of in sealed bags or containers.

2. INTRODUCTION

Fitted with variable electronic temperature control and LCD temperature display. Suitable for paint stripping, soft soldering, removing sticky labels and defrosting frozen pipes. Double insulated and fitted with 3-pin plug. Supplied with four nozzles, stripper, scraper handle, three scraper blades, all in a storage case.

3. SPECIFICATION

Model No:..... HS104K.V2
Airflow: 480L/min
Fuse Rating:..... 13A
Motor Power:..... 2000W
Supply:230V
Temperature Range:80°C/80-600°C
Power Supply Cable Length:..... 1.8m
Weight:..... 2.14kg
Contents:
Heat gun, Four Nozzles, Stripper, Scraper Handle, Three Scraper Blades

4. FEATURES

5. OPERATION

5.1. PREPARATION

- 5.1.1. Select and fit a suitable nozzle for the work area (if required).
- 5.1.2. Connect to the power supply, ensuring the On/Off switch is in the '0' position.
- 5.1.3. Set the switch to the required setting: position '1' (80°C) or position '2' (variable - 80 to 600°C). Rotate the temperature dial to the required temperature setting.
- 5.1.4. It is best to start at a lower temperature and gradually increase it if necessary. Allow a short period for the gun to reach the desired temperature, using the LCD display for reference.

NOTE: When new, the heat gun may generate some smoke, this will decrease with use.

☐ **WARNING!** Keep hands away from the immediate nozzle area. If lead paint is being removed follow the safety instructions.

5.2. PAINT AND VARNISH REMOVAL

- 5.2.1. The easy removal of paint and varnish requires practice. Follow these simple working techniques to achieve the required result.
NOTE: the heat gun is designed to remove both oil and latex based paints and varnishes from surfaces. It will not remove stains or primer coats that have impregnated the surface.
- 5.2.2. Always test on a small non-critical area first.
- 5.2.3. Select a shaped scraper suitable for the work area, and fix it securely to the scraper handle by tightening the nuts either side of it.
- 5.2.4. Hold the gun nozzle 75mm to 100mm from the paint to be removed.
- 5.2.5. After a short time the paint will soften and begin to blister.
 - * **DO NOT** overheat the paint as this will cause it to burn, making it more difficult to remove. Wear eye protection, especially when stripping paint from overhead. If lead paint is being removed, refer to the warning in section 1.
- 5.2.6. Begin scraping the paint off. Work from top to bottom. Use the scraper with smooth even strokes, heating the surface in front of the scraper by moving the gun slightly from side to side.
- 5.2.7. If the correct temperature has been applied to the paint, thick, even layers can be removed in a single pass (paint should be removed in strips equal in width to the scraper blade). Scrape paint as soon as it becomes soft, as it will re-harden very quickly.

6. MAINTENANCE

- ❑ **WARNING!** Unplug gun from power supply and allow to cool before performing any maintenance.
- 6.1. Keep the air intake and outlet openings clean and free from dirt and peelings.
- 6.2. Use only a slightly dampened cloth and mild household cleaning agent to wipe the gun clean.
- × **DO NOT** use turpentine, paint thinner, gasoline or similar substances to clean the gun.
- 6.3. Store the gun in a safe, dry, childproof area.

ENVIRONMENT PROTECTION

Recycle unwanted materials instead of disposing of them as waste. All tools, accessories and packaging should be sorted, taken to a recycling centre and disposed of in a manner which is compatible with the environment. When the product becomes completely unserviceable and requires disposal, drain any fluids (if applicable) into approved containers and dispose of the product and fluids according to local regulations.

WEEE REGULATIONS

Dispose of this product at the end of its working life in compliance with the EU Directive on Waste Electrical and Electronic Equipment (WEEE). When the product is no longer required, it must be disposed of in an environmentally protective way. Contact your local solid waste authority for recycling information.

Note: It is our policy to continually improve products and as such we reserve the right to alter data, specifications and component parts without prior notice.

Important: No Liability is accepted for incorrect use of this product.

Warranty: Guarantee is 12 months from purchase date, proof of which is required for any claim.
