

# TYRE INFLATOR WITH WORKLIGHT 12V

MODEL NO: **MAC11**

Thank you for purchasing a Sealey product. Manufactured to a high standard, this product will, if used according to these instructions, and properly maintained, give you years of trouble free performance.

**IMPORTANT:** PLEASE READ THESE INSTRUCTIONS CAREFULLY. NOTE THE SAFE OPERATIONAL REQUIREMENTS, WARNINGS & CAUTIONS. USE THE PRODUCT CORRECTLY AND WITH CARE FOR THE PURPOSE FOR WHICH IT IS INTENDED. FAILURE TO DO SO MAY CAUSE DAMAGE AND/OR PERSONAL INJURY AND WILL INVALIDATE THE WARRANTY. KEEP THESE INSTRUCTIONS SAFE FOR FUTURE USE.

## 1. SAFETY

- ✓ Read the manual before using this product. Thoroughly understand operating procedures, safety warnings and maintenance requirements. Keep the manual in a convenient place for all users to see and use. Keep labels as per original.
- ✓ The inflator only operates with a 12V electrical system.
- ✓ Consult your vehicle's manual or a qualified mechanic for proper connection procedure.
- ✓ After 30 minutes of continuous operation, allow the inflator to cool before restarting.
- ✓ Damage can occur from continued overuse.
- ✓ The inflator was permanently lubricated during assembly. **DO NOT** add oil or any other lubricant.
- ✓ The inflator will become HOT after using for a long period of time. When used for a long period of time, the compressed air hose and device may become noticeably warm.
- ✓ Please use caution when touching the inflator in order to avoid burns. Allow the inflator to cool down sufficiently before storing.
- ✓ Only inflate tyres to the manufacturer's recommended pressure. **DO NOT** over inflate as serious injury could occur.
- ✓ Keep the inflator away from small children.
- ✓ Clean with a damp cloth only. **DO NOT** use chemicals or soap.
- ✗ **DO NOT** use the inflator for pumping any gas or liquid other than air.
- ✓ The inflator is not designed for use as a source for breathable air.
- ✓ The inflator is designed for use with car tyres. It is not designed for use with large tyres like tractor or truck tyres.
- ✗ **DO NOT** use (or modify) the inflator for any other purpose than that for which it was designed.
- ✓ Use extra caution when inflating small objects like bicycle tyres or sports balls.
- ✓ The warnings, precautions, and instructions discussed in this instruction manual cannot cover all possible conditions and situations that may occur. It must be understood by the operator that common sense and caution are applied when using this product.
- ✓ Failure to heed these warnings may result in fatal personal injury and/or property damage.

## 2. INTRODUCTION

Suitable for inflating tyres on cars, vans, 4x4s, motorcycles and bicycles. Maximum pressure 120psi. Pressure units in psi, kPa, kg/cm<sup>2</sup> and bar. Airflow 0.78cfm 22L/min with an inflation time 0-30psi in 263sec (175/70/R13). Analogue gauge with an LED worklight. Runtime: 30mins. Supplied with a 3m 12V plug, ball spike and inflatable adaptor.

## 3. SPECIFICATION

MODEL NO:	MAC11
Hose Length	360mm
Maximum Current	10A
Maximum Pressure	120psi
Nett Weight	0.5kg
Operating Voltage	12V
Power Cord Length	3m
Typical Inflation Time	0-30psi in 263sec (175/70/R13).

## 4. CONTENTS

## 5. OPERATION

**IMPORTANT:** ensure you have read and understand all safety instructions before operating the device.

1. Check the door jamb or fuel door for correct tyre pressure. Alternatively check the vehicle's manual.

2. Connect the power cord to the 12V DC power port on the vehicle. Place the unit on a dry level surface. The built in LED work light will immediately illuminate once connected to power.

3 Connect the air hose to the tyre valve stem. Ensure the connector is secure.

4. Press the power button to start inflating. The mini compressor will commence operation. Press the power button to stop the unit once desired pressure is reached.

**NOTE:** If unit does not come on check the fuse in the 12V plug. Replace if blown.

### WEEE REGULATIONS

Dispose of this product at the end of its working life in compliance with the EU Directive on Waste Electrical and Electronic Equipment (WEEE). When the product is no longer required, it must be disposed of in an environmentally protective way. Contact your local solid waste authority for recycling information.

### ENVIRONMENT PROTECTION

Recycle unwanted materials instead of disposing of them as waste. All tools, accessories and packaging should be sorted, taken to a recycling centre and disposed of in a manner which is compatible with the environment. When the product becomes completely unserviceable and requires disposal, drain any fluids (if applicable) into approved containers and dispose of the product and fluids according to local regulations.
