

# PRESSURE WASHER WITH TSS & ROTABLAST® NOZZLE & SNOW FOAM GUN 130BAR, 1600W

MODEL NO: **PW1860.V2**

Thank you for purchasing a Sealey product. Manufactured to a high standard, this product will, if used according to these instructions, and properly maintained, give you years of trouble free performance.

**IMPORTANT:** PLEASE READ THESE INSTRUCTIONS CAREFULLY. NOTE THE SAFE OPERATIONAL REQUIREMENTS, WARNINGS & CAUTIONS. USE THE PRODUCT CORRECTLY AND WITH CARE FOR THE PURPOSE FOR WHICH IT IS INTENDED. FAILURE TO DO SO MAY CAUSE DAMAGE AND/OR PERSONAL INJURY AND WILL INVALIDATE THE WARRANTY. KEEP THESE INSTRUCTIONS SAFE FOR FUTURE USE.

Refer to  
instructions

Wear face  
protection

Wear protective  
gloves

Wear safety  
footwear

Wear protective  
clothing

Wear ear  
protection

**DO NOT**  
drink water  
from pressure  
washer

**DO NOT** direct jet  
against yourself,  
other persons,  
animals, electrical  
equipment or the  
machine itself

## 1. SAFETY

### CAUTION - READ THE INSTRUCTIONS BEFORE USING THE MACHINE.

#### 1.1. ELECTRICAL SAFETY

- ☐ **WARNING!** It is the user's responsibility to check the following:
  - ✓ Check all electrical equipment and appliances to ensure that they are safe before using. Inspect power supply leads, plugs and all electrical connections for wear and damage. Sealey recommend that an RCD (Residual Current Device) is used with all electrical products.
- Electrical safety information.** It is important that the following information is read and understood:
  - ✓ Ensure that the insulation on all cables and on the appliance is safe before connecting it to the power supply.
  - ✓ Regularly inspect power supply cables and plugs for wear or damage and check all connections to ensure that they are secure.
- Important:** Ensure that the voltage rating on the appliance suits the power supply to be used and that the plug is fitted with the correct fuse.
  - ✗ **DO NOT** pull or carry the appliance by the power cable.
  - ✗ **DO NOT** pull the plug from the socket by the cable.
  - ✗ **DO NOT** use worn or damaged cables, plugs or connectors. Ensure that any faulty item is repaired or is replaced immediately by a qualified electrician.
- If the cable or plug is damaged during use, switch off the electricity supply and remove from use. Cable must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- ✓ The Electric supply connection shall be made by a qualified electrician and comply with IEC 60364-1.
- ✓ It is recommended that the electric supply to this machine should include either a residual current device that will interrupt the supply if the leakage current to earth exceeds 30mA for 30ms or a device that will prove the earth circuit.
- ☐ **WARNING!** Inadequate extensions cords can be dangerous. If an extension cord is used, it shall be suitable for outdoor use, and the connection has to be kept dry and off the ground. It is recommended that this is accomplished by means of a suitably rated cord reel which keeps the socket at least 60mm above the ground.

**Ensure that repairs are carried out by a qualified electrician.**

#### 1.2. PRESSURE WASHER SAFETY

- ✓ Read the instructions fully before use. The manual forms an integral part of the appliance and should be kept for future reference. Please read it carefully before installing/using the unit. If the appliance is sold, the seller must pass on this manual to the new owner along with the appliance.
- ☐ **WARNING!** Wear appropriate personal protective equipment for the task in hand. Risk assess the task and select: safety boots, safety gloves, safety helmets with visors, protective clothing, hearing protection as necessary.
- ☐ **WARNING! Machine/high pressure cleaners, shall not be used by children or untrained personnel.**
  - ✗ **DO NOT** allow children to use the appliance; supervise them to ensure that they do not play with it.
- ☐ **WARNING! RISK OF EXPLOSION. DO NOT** use the appliance to spray flammable liquids.
  - DO NOT** use the appliance with flammable or toxic liquids, or any products which are not compatible with its correct operation. Use of the appliance in a potentially inflammable or explosive atmosphere is forbidden.
- ☐ **WARNING! HIGH PRESSURE JETS** can be dangerous if subject to misuse. The jet must not be directed at persons, live electrical equipment or at the unit itself.
- ☐ **WARNING! HIGH PRESSURE HOSES, fittings and couplings** are important for the safety of the machine. Use only hoses, fittings and couplings recommended by the manufacturer.
  - ✗ **DO NOT** point the water jet at people or animals.
  - ✗ **DO NOT** splash or wash the machine down.
- ☐ **WARNING! ENSURE** that all people or animals keep a minimum distance of 15m.
  - ✗ **DO NOT** use the appliance with people within its range of action unless they wear protective clothing.
  - ✗ **DO NOT** direct the jet at yourself or others in order to clean clothing or footwear.
  - ✗ **DO NOT** use the appliance outdoors when it is raining.
  - ✗ **DO NOT** touch the plug and/or socket with wet hands.
  - ✗ **DO NOT** use the appliance if the electric cable is damaged. If the electric cable is damaged, it must be replaced by the manufacturer, one of its authorised Service Centres or similarly qualified persons in order to avoid a safety hazard.
  - ✗ **DO NOT** use the appliance if important parts such as the safety devices, high pressure hoses, trigger or gun are damaged.
  - ✗ **DO NOT** jam the trigger in the operating position.

- ✓ Check that the data plate is affixed to the appliance. If not, inform your supplying stockist. Appliances without plates must NOT be used as they are unidentifiable and potentially dangerous.
  - ✗ **DO NOT** tamper with or adjust the setting of the safety valve or the safety devices.
  - ✗ **DO NOT** alter the original diameter of the spray head nozzle.
  - ✗ **DO NOT** move the appliance by pulling on the ELECTRIC CABLE. Use the handle and transport by use of the wheels.
  - ✗ **DO NOT** allow vehicles to drive over the high pressure hose.
  - ✗ **DO NOT** move the appliance by pulling on the high pressure hose.
  - ❑ **WARNING!** Use the washer on a flat, level surface in an upright position. NEVER lay the washer down during use.
  - ❑ **WARNING!** When directed towards tyres, tyre valves or other pressurised components, the high pressure jet is potentially dangerous.
  - ✗ **DO NOT** use the rotating nozzle kit, and always keep the jet at a distance of at least 30 cm during cleaning.
  - ❑ **WARNING!** The use of non-original accessories and any other spare parts not specifically intended for the model in question is prohibited. All modifications to the appliance are prohibited.
  - ❑ **WARNING!** The electric supply connection must be made by a qualified electrician and comply with IEC 60364-1. Either a residual current device that will cut off the power supply if the leakage current to earth exceeds 30 mA for 30 ms or a ground fault interrupt device must be installed.
  - ❑ **WARNING!** Use of a residual current breaker (RCB) will provide additional protection for the operator (30 mA).
  - ❑ **WARNING!** Always turn off the switch when leaving the appliance unattended. The machine must be attended during operation.
  - ❑ **WARNING!** High pressure may cause parts to rebound: wear all the protective clothing (PPE) and equipment needed to ensure the operator's safety.
  - ❑ **WARNING!** Before performing Maintenance, making adjustments to the appliance, converting to another function **ALWAYS** disconnect from mains supply.
  - ✓ Supply hose must be reinforced and have an internal diameter of 1/2" (13mm).
  - ✓ Water supply must be equal to cleaner capacity. Water temperature must not exceed 60°C. Water supply pressure must be to Specification (see Specification section below.)
  - ✓ Only use where air can circulate freely, **DO NOT** block ventilation grilles.
  - ❑ **WARNING!** Before pressing the trigger, GRIP the gun firmly to counteract the recoil.
  - ❑ **WARNING!** COMPLY WITH the local water supply authority regulations. The appliance may only be connected to the mains drinking water supply if the supply hose is fitted with a back-flow preventer valve.
  - ❑ **WARNING!** Water that has passed through a back-flow preventer is considered to be non-potable.
  - ❑ **WARNING!** Maintenance and/or repair of electrical components MUST be carried out by suitably qualified staff.
  - ❑ **WARNING!** DISCHARGE residual pressure before disconnecting the hose from the appliance.
  - ❑ **WARNING!** CHECK before each use and at regular intervals that the screws are fully tightened and that there are no broken or worn parts.
  - ❑ **WARNING!** This appliance is designed for use with the detergent supplied or recommended by the manufacturer. The use of other detergents or chemicals may adversely affect the appliance's safety.
  - ❑ **WARNING!** To ensure the appliance's safety, only use original spare parts from the manufacturer or approved by the manufacturer.
  - ❑ **WARNING!** Switch the appliance off and disconnect it from the power supply before assembly, cleaning, adjustments, maintenance, storage and transportation.
- Commercial use:** This machine is not intended for use by persons (Including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge.
- Not for commercial use:** This machine can be used by people with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the machine in a safe way and understand the hazards involved.

## 2. INTRODUCTION

Ideal for cleaning vehicles, machinery, as well as patios and other outdoor surfaces. Brass quick release system allows for fast selection between nozzles and allows compatibility across the Sealey range of pressure washers and accessories. Pressure gun includes lock to avoid accidental start. 1600W Motor produces up to 130bar of pressure with an impressive 420L/hr flow rate. Automatic Total Stop System (TSS) which switches the motor on and off when the trigger is operated, prolonging motor life. Self-priming motor can be used with a still water source for maximum portability. Supplied with 5m pressurized hose for ease of use and 5m power cable for extended reach. Supplied with Rotablast® nozzle, snow foam gun, adjustable fan nozzle and set of four interchangeable nozzles (0°, 15°, 25°, 40°) supplied on a lance storage sleeve.

## 3. SPECIFICATION

|                           |                  |                                       |  |

## 4. CONTENTS

| Item No.          | Description             |
|-------------------|-------------------------|
| 1                 | Wand                    |
| 2                 | Middle extension lance  |
| 3                 | Main lance              |
| Red (A) nozzle    | 0°                      |
| Yellow (B) nozzle | 15°                     |
| Green (C) nozzle  | 25°                     |
| White (D) nozzle  | 40°                     |
| 4                 | Detergent bottle        |
| 5                 | High pressure hose hook |
| 6                 | Cleaning pin            |
| 7                 | Manual                  |
| 8                 | Screws package          |
| 9                 | Gun holder              |
| 10                | Water inlet opening     |
| 11                | Water inlet connector   |
| 12                | Water outlet            |
| 13                | Wheel                   |
| 14                | Power cord              |
| 15                | ON/OFF switch           |
| 16                | Power Cable Hook        |
| 17                | (not used)              |
| 18                | High pressure hose      |
| 19                | Lock-off switch         |
| 20                | Handle lock             |
| 21                | Long handle             |

## 5. ASSEMBLY

### 5.1. ATTACH THE MIDDLE EXTENSION LANCE TO WAND FIGS 1 & 2

**Note:** When attaching, align the two projections on the middle extension lance with the grooves on the wand.

### 5.2. Attach the main lance to the middle extension lance.

### 5.3. Pull back quick release mechanism of the main lance and select the nozzle required and insert. Then release the mechanism.

#### 5.4. MOUNTING THE HANDLE AND HOSE HOOK FIG.3

- 5.4.1. Screw the handle (17) tight to the main unit (2 screws) and screw the hose hook (18) tight to handle (4 screws) . The screws will be packed together with the manual.

#### 5.5. MOUNTING THE HIGH PRESSURE HOSE HOOK FIG.4

- 5.5.1. Screw high pressure hose hook (8) onto the main unit (2 screws). The screws will be packed together with the manual.

**Note:** All screws are packed in one bag.

#### 5.6. FIT GUN HOLDER AND POWER CABLE HOOK FIG.5

#### 5.7. ATTACH & DETACH THE HIGH PRESSURE HOSE FIG.6

- 5.7.1. **Attach** one end of the high pressure hose (19) to the pressure water outlet of the machine and the other end of the high pressure hose to the wand.

**Note:** After the high pressure hose is connected, check the connection by gently pulling on the hose to ensure it stays connected.

- 5.7.2. **Detach the high pressure hose:** Turn switch to "OFF/II" position. Pull trigger to drain water from wand, push the lock button and pull.

#### 5.8. ATTACH THE GARDEN HOSE FIG.8

- 5.8.1. Remove the plastic plug from the water inlet pipe of the machine and screw the water inlet connector onto the water inlet pipe.

- 5.8.2. Connect one end of the garden hose (not supplied) to the water inlet connector and another end to water source.

☐ **WARNING!** The appliance is INTENDED to be used at a temperature above 0°C.

☐ **WARNING!** Garden hose must be in good condition. Inner diameter no less than 1/2", length can not be greater than 8m.

- 5.9. Connect to mains power.

## 6. OPERATION

- ☐ **WARNING!** During operation appliance must be positioned on firm, stable surface. High pressure hose must not be coiled on the washer. When operating the machine, it must only be used upright.
- ☐ **WARNING!** Check that the supply voltage and frequency correspond to those specified on the appliance data plate. The appliance should only be connected to a mains power supply via a security breaker (Max.30mA) to cut off the electricity supply in the instance of a short circuit.

## 6.1. START UP FIG.9

6.1.1. Turn water on. Squeeze trigger for approx. 1 minute until low pressure water flows out, to empty air out of the unit.

❑ **WARNING!** For use with cold water only.

**Note:** Before pressing trigger, make sure lock-off switch is in “unlock” position.

6.1.2. Turn the switch to “ON/I” position, then press trigger.

❑ **WARNING! DO NOT** start the machine without connecting and turning on the water supply, it may cause damage to high pressure seals and reduce the service life of pump.

## 6.2. CLEANING

6.2.1. Squeeze the trigger, high pressure water flow will come out.

6.2.2. Pull back quick release mechanism at the end of the main lance, select the nozzle required and insert. Release the mechanism to change nozzle.

**Note:** Begin with the nozzle 1-2ft away from the surface and approach with caution until it reaches the desired position. Too close a spray may do harm to the surface.

❑ **WARNING! DO NOT** connect the machine to water supplies that are dirty, rusty, muddy, or corrosive, including window cleaning liquids, plant foods, or fertilizers etc.

6.2.3. When cleaning is finished, release the trigger and turn the switch to “OFF/O” position, then turn off the water supply.

**Note:** When not in use, make sure Lock-off switch is in “Lock” position.

**Note:** Using pressure washer after water supply has been turned off, serious damage could occur to the pump and/or motor.

❑ **WARNING!** Never disconnect high pressure discharge hose from machine while system is pressurized. To de-pressurize, turn switch off, turn water supply off and squeeze gun trigger 2-3 times.

6.2.4. Disconnect from mains supply.

## 6.3. SAFETY VALVE/PRESSURE LIMITING VALVE

❑ **WARNING! DO NOT** tamper with or adjust the safety valve setting.

6.3.1. The safety valve is also a pressure limiting valve. When the gun trigger is released, the valve opens, pressure switch operates, and the machine automatically shut down. If the gun nozzle is blocked, will cause the machine pressure rises, the safety valve opens, the pressure switch activates, the machine automatically shuts down.

6.3.2. Refer to section 7.2 to use a needle to clean the nozzle.

## 6.4. GUN SAFETY BUTTON FIG.10

6.4.1. Operator needs to press the unlock button and then actuate the trigger to release spray.

6.4.2. When trigger is released, trigger will return to the off position automatically.

6.4.3. When not using the pressure cleaner, press the lock button to keep from accidentally engaging the high pressure spray.

## 6.5. HOLDING THE GUN

6.5.1. Hold the gun correctly to resist kickback forces: one hand on the handle, one on the lance.

## 6.6. TO WASH WITH DETERGENT FIG.11

- 6.6.1. Fill detergent bottle with a recommended detergent or cleaner with a water ratio according to instructions on the detergent. Connect bottle to lance.
- 6.6.2. Squeeze the wand trigger, detergent will come out through the nozzle. The adjustment knob on the detergent bottle will adjust the concentration of detergent.
- 6.6.3. Apply detergent so it thoroughly covers cleaning surface.
- 6.6.4. Allow detergent to remain on the surface for a few minutes. Use a brush to lightly scrub heavily soiled areas.
- 6.6.5. Change to spray nozzle, rinse detergent from surface.
- 6.6.6. **Cleaning up:** Always draw fresh water through the detergent bottle when done to flush any remaining detergents from the injection system. The bottle could be detached if necessary in this process.

fig.11

## 6.7. PLACEMENT OF ACCESSORIES ON THE MACHINE FIG.12

- 6.7.1. Gun, power lead, hose and accessories are placed as shown.

fig.12

fig.13

## 7. MAINTENANCE

- ❑ **WARNING!** Always disconnect from mains supply before carrying out any work on the appliance.  
**Note:** Any maintenance operations not covered by this chapter should be carried out by an properly qualified persons or the manufacturer.

### 7.1. CLEANING OF WATER INLET FILTER FIG.13

- 7.1.1. The water filter installed inside the water inlet connector, should be cleaned periodically. Rinse it with clean tap water, and then place it back into the water inlet connector.

### 7.2. CLEANING THE NOZZLE FIG.14

- 7.2.1. Using the nozzle tip cleaner provided (or an unfolded paper clip), insert the wire into the nozzle hole and move back and forth until debris is dislodged. Back flush water through the nozzles using garden hose.

### 7.3. CLEANING OF MACHINE VENTS

- 7.3.1. The machine should be kept clean so as to let cooling air pass easily through the machine vents.

### 7.4. GREASE COUPLINGS

- 7.4.1. To ensure easy connection and that o-rings work effectively, the couplings should be greased regularly.

fig.14

## 8. STORAGE

- 8.1. Disconnect the water source, turn on the pressure washer for a few seconds until the remaining water flows out, then turn it off quickly.
- 8.2. Unplug the mains supply.
- 8.3. Disconnect the high pressure hose and the garden hose, and coil high pressure hose for storage.
- 8.4. Store in a frost free area with a temperature above 0°C.

## 9. TROUBLESHOOTING

| Symptom                                  | Cause                            | Recommended action   |
|--|----------------------------------|--|
| Machine refuses to start                 | Machine not plugged in           | Plug in machine.   |
|  | Defective socket                 | Try another socket.  |
|  | Fuse has blown                   | Replace fuse, switch off other machines.                                       |
|  | Defective extension cable        | Try without the extension cable.   |
| Fluctuating pressure                     | Pump sucking air                 | Check that hoses and connections are airtight.                                 |
|  | Valves dirty, worn out or stuck  | Refer to local distributor.  |
|  | Pump seals worn out              | Refer to local distributor.  |
| Machine stops                            | Fuse has blown                   | Replace fuse. Switch off other machines.                                       |
|  | Incorrect mains voltage          | Check the mains voltage  |
|  | Thermal sensor activated         | Leave the washer for 5 minutes to cool down.                                   |
|  | Nozzle partially blocked         | Clean the nozzle.  |
| Fuse blows                               | Fuse rating incorrect            | Fit correct fuse (see instructions for value)                                  |
|  |                                  | You may try without the extension cable.                                       |
| Machine pulsating                        | Air in inlet hose/pump           | Allow machine to run with open trigger until regular working pressure resumes. |
| Machine refuses to run                   | Machine not plugged in           | Plug in machine  |
|  | Defective socket                 | Try another socket   |
|  | Fuse has blown                   | Replace fuse   |
|  | Defective extension cable        | Try without extension cable  |
| Fluctuating pressure                     | Pump sucking air                 | Check that hoses and connections are airtight                                  |
|  | Valves dirty, worn or stuck      | Clean and replace or return for repair   |
|  | Pump seals worn out              | Clean and replace or return for repair   |
| Machine stops                            | Fuse has blown                   | Replace fuse. Switch off other machines  |
|  | Incorrect mains voltage          | Check that the mains voltage corresponds to specification on the model tag     |
|  | Thermal sensor activated         | Leave the washer for 5 minutes to cool down                                    |
|  | Nozzle partially blocked         | Clean the nozzle   |
| Fuse blows                               | Fuse too small                   | Change to an installation higher than the amps consumption of the machine      |
|  |                                  | Try without an extension cable   |
| Machine pulsating                        | Air in inlet hose/pump           | Allow machine to run with open trigger until regular working pressure resumes  |
|  | Inadequate supply of mains water | Check that the water supply corresponds to specifications required             |
|  | Nozzle partially blocked         | Clean the nozzle   |
|  | Water filter blocked             | Clean the filter   |
| Machine often starts and stops by itself | Hose kinked                      | Straighten out hose  |
|  | Pump/hose or accessory frozen    | Wait for pump/hoses or accessory to thaw                                       |
|  | No water supply                  | Connect inlet water  |
|  | Water filter blocked             | Clean the filter   |
| Machine starts, but no water comes out   | Nozzle blocked                   | Clean the nozzle   |
|  | Pump/hose or accessory frozen    | Wait for pump/hoses or accessory to thaw                                       |
|  | No water supply                  | Connect inlet water  |
|  | Water filter blocked             | Clean the filter   |
|  | Nozzle blocked                   | Clean the nozzle   |

### ENVIRONMENT PROTECTION

Recycle unwanted materials instead of disposing of them as waste. All tools, accessories and packaging should be sorted, taken to a recycling centre and disposed of in a manner which is compatible with the environment. When the product becomes completely unserviceable and requires disposal, drain any fluids (if applicable) into approved containers and dispose of the product and fluids according to local regulations.

### WEEE REGULATIONS

Dispose of this product at the end of its working life in compliance with the EU Directive on Waste Electrical and Electronic Equipment (WEEE). When the product is no longer required, it must be disposed of in an environmentally protective way. Contact your local solid waste authority for recycling information.

**Note:** It is our policy to continually improve products and as such we reserve the right to alter data, specifications and component parts without prior notice. Please note that other versions of this product are available. If you require documentation for alternative versions, please email or call our technical team on [technical@sealey.co.uk](mailto:technical@sealey.co.uk) or 01284 757505.

**Important:** No Liability is accepted for incorrect use of this product.

**Warranty:** Guarantee is 12 months from purchase date, proof of which is required for any claim.
