

Section 1. Product and Company Identification.

1.1 Model Number; VS909 v1
1.2 Description; Pocket Infrared Laser Digital Thermometer
Battery: 1.5Volt. 24 grams.

1.3 Manufacturer;

Sealey Group.
Kempson Way,
Bury St. Edmunds,
Suffolk.
IP32 7AR

1.4 Emergency telephone number; 44 (0) 1284 757 500 (Office Hours)

Date of source compilation; 1 January 2016

Section 2. Hazards Identification.

Battery is hermetically sealed and does not present a hazard under normal conditions of use.

Ingestion: Swallowing a battery can be harmful. Contents of an open battery can cause serious chemical burns of mouth, oesophagus, and gastrointestinal tract.

Inhalation: Contents of an open battery can cause respiratory irritation.

Skin Contact: Contents of an open battery can cause skin irritation and/or chemical burns.

Eye Contact: Contents of an open battery can cause severe irritation and chemical burns.

Section 3. Substances.

3.1 Chemical Name (substance)	3.1 CAS No.	3.2 Concentration	Classification	
			Hazard Class & Category Code	Hazard Statements
Manganese Dioxide	1313-13-9	38%	Acute Tox. 4 Acute Tox. 4 Xn; R20/22	H332 H302
Steel (Shell)	7439-89-6	30%	-	-
Zinc	7440-66-6	15%	Aquatic Acute 1 Aquatic Chronic 1 F; R15-17	H400 H410
Potassium Hydroxide	1310-58-3	5%	Acute Tox. 4 Skin Corr. 1A N; R50-53 Xn; R22 C; R35	H302 H314
Graphite	7782-42-5	4%	-	-
Brass (Pin)	7440-50-8	4%	-	-
Nylon (Gasket)	32131-17-2	3.2%	-	-
Polyethylene Terephthalate (Label)	25038-59-9	0.8%	-	-
Mercury	7439-97-6	Not detected (< 1ppm)	-	-
Cadmium	7439-92-1	Not detected (< 5ppm)	-	-
Lead	7440-43-9	Not detected (< 20ppm)	-	-

For full text of Phrases and Statements, see Section 16.

Section 4. First Aid Measures.

Batteries do not pose a risk to eyes or skin under normal circumstances.
In the case of contact with internal substances;

4.1 Description of first aid measures

- Inhalation** If breathing difficulties develop, remove the person to fresh air.
Loosen close fitting clothing.
Ensure that person is warm.
Get medical attention.
- Skin Contact** Remove contaminated clothing.
Wash affected area(s) with soap and water.
Seek medical attention if chemical burn(s) appear or if symptoms persist.
- Eye Contact** irrigate eyes with water for at least 15 minutes while raising eyelid(s).
Get medical attention.
- Ingestion** Do not induce vomiting.
Do not give food or drink.
Get medical attention.

Do not induce vomiting.
Do not give food or drink.
Seek medical attention.

4.2. Most important symptoms and effects, both acute and delayed
No information available.

4.3. Indication of any immediate medical attention and special treatment needed
No information available.

Section 5. Fire Fighting Measures.

5.1. Extinguishing media
Any extinguishing media.
Use extinguishing media that is appropriate for the surrounding area.

5.2. Special hazards arising from the substance or mixture
Move batteries away from a fire incident, if safe to do so.
Cool batteries to reduce the risk of rupture.

5.3. Advice for fire-fighters
Fire Fighters should wear self-contained breathing apparatus and appropriate Personal Protective Equipment.
Thermal degradation may produce hazardous fumes of zinc and manganese; hydrogen gas, caustic vapours of potassium hydroxide and other toxic by-products.

Section 6. Accidental Release Measures.

6.1. Personal precautions, protective equipment and emergency procedures

Wear appropriate protective clothing, see section 8.

6.2. Environmental precautions

Ventilate area.

6.3. Methods and material for containment and cleaning up

Collect in a leak proof container.

Place battery in a sealed bag with an absorbent such as sand, silica, chalk, lime powder or vermiculite.

Rinse contamination with water.

Prevent contaminated water from entering sewers or water courses.

6.4. Reference to other sections

See Section 7 for information on Safe Handling

See Section 8 for information of Personal Protective Equipment.

See Section 13 for information on disposal.

Section 7. Handling and Storage.

7.1. Precautions for safe handling

Wear appropriate protective clothing, see section 8

7.2. Conditions for safe storage, including any incompatibilities

Store batteries in a well ventilated area.

Do not short circuit a battery. A short circuit causes heating and can lead to ignition of surrounding materials.

To minimize the risk of a short circuit, always store batteries in an appropriate container to prevent contact with conductive materials.

Keep batteries away from children.

7.3. Specific end use(s)

Intended for use as the battery for the Model Number identified in 1.1 with Description stated in 1.2.

Section 8. Exposure Controls/Personal Protection.

8.1. Control parameters

In the event of battery rupture and leakage:

Ventilate the area.

Remove sources of ignition.

8.2. Exposure controls

The use of Personal Protective Equipment (PPE) is not necessary under conditions of normal use.

If handling a leaking or ruptured battery, ensure that the following Personal Protective Equipment (PPE) is used.

Eye/Face Protection

Chemical grade full face shield

Skin Protection

Acid resistant, natural rubber or neoprene gloves.

Protective rubber apron

Appropriate Personal Protection with long sleeves and long trousers.

Respiratory Protection

Acid gas filter mask or self-contained breathing apparatus.

Section 9. Physical and Chemical Properties.

9.1. Information on basic physical and chemical properties

The following information is not a technical specification or sales specification.

(a) Appearance:	Cylindrical battery.
(b) Odour:	Not relevant to an intact battery.
(c) Odour threshold;	Not relevant to an intact battery.
(d) pH:	Not relevant to an intact battery.
(e) Melting point/freezing point;	Not relevant to an intact battery.
(f) Initial boiling point and boiling range;	Not relevant to an intact battery.
(g) Flash point;	Not relevant to an intact battery.
(h) Evaporation rate;	Not relevant to an intact battery.
(i) Flammability (solid, gas);	Not relevant to an intact battery.
(j) Upper/lower flammability or explosive limits;	Not relevant to an intact battery.
(k) Vapour pressure;	Not relevant to an intact battery.
(l) Vapour density;	Not relevant to an intact battery.
(m) Relative density;	Not relevant to an intact battery.
(n) Solubility(ies);	Not relevant to an intact battery.
(o) Partition coefficient: n-octanol/water;	Not relevant to an intact battery.
(p) Auto-ignition temperature;	Not relevant to an intact battery.
(q) Decomposition temperature;	Not relevant to an intact battery.
(r) Viscosity;	Not relevant to an intact battery.
(s) Explosive properties;	No information available.
(t) Oxidising properties:	No information available.

9.2 Other information: No other information available.

Section 10. Stability and Reactivity.

10.1. Reactivity:	No information available.
10.2. Chemical stability:	Stable
10.3. Possibility of hazardous reactions:	No.
10.4. Conditions to avoid:	Avoid temperature higher than 40°C. Avoid Relative humidity below 45% or higher than 65% for storage or working.
10.5. Incompatible materials:	No information available.
10.6. Hazardous decomposition products:	No information available.

Section 11. Toxicological Information.

11.1. Information on toxicological effects

The materials that comprise this battery are hermetically sealed.

The potential for exposure to materials is negligible when this battery is used as directed. See Section 7.

Inappropriate handling and / or inappropriate use of this battery may result in release of the materials that are sealed within.

Inhalation, skin contact and eye contact are possible when the battery is opened.

Exposure to internal components and corrosive fumes will cause irritation to the eyes skin and mucous membranes.

Section 12. Ecological Information.

When properly used and disposed of correctly, the battery does not present environmental hazard.

Do not release internal components into water ways, wastewater or ground water.

12.1. Toxicity	No data available.
12.2. Persistence and degradability	No data available.
12.3. Bioaccumulative potential	No data available.
12.4. Mobility in soil	No data available.
12.5. Results of PBT and vPvB assessment	No data available.
12.6. Other adverse effects	No data available.

Section 13. Disposal Considerations.

13.1. Waste treatment methods

Disposal of the battery must be in accordance with local authority regulation.

The battery should be completely discharged prior to disposal and the terminals taped or capped to prevent short circuit.

Do not dispose of batteries with household waste.

Do not dispose of batteries at landfill sites.

Do not incinerate batteries.

Section 14. Transport Information.

ADR. International Carriage of Dangerous Goods by Road.

Not subject to ADR.

IATA. International Air Transport Association.

Special Provision A123.

Batteries not otherwise listed as Dangerous Goods concerning transport by air, no UN Code refers.

Examples of such batteries are (but not restricted to) alkali-manganese, zinc-carbon and nickel cadmium batteries.

Any electrical battery or battery powered device, equipment or vehicle having the potential of a dangerous evolution of heat must be prepared for transport so as to prevent:

(a) a short circuit (e.g. in the case of batteries, by the effective insulation of exposed terminals; or in the case of equipment, by the disconnection of the battery and protection of exposed terminals); and

(b) accidental activation.

The statement "Not restricted, as per Special Provision A123" must be included in the description of the article on the Air Waybill when required.

IMDG. International Maritime Dangerous Goods.

Not subject to IMDG.

Section 15. Regulatory Information.

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture:
No information available.

15.2. Chemical safety assessment: No information available.
No information available.

Section 16. Additional Information.

Full text of Phrases and Statements used in Section 3;

R15 Contact with water liberates extremely flammable gases.

R17 Spontaneously flammable in air.

R20: Harmful by inhalation.

R22: Harmful if swallowed.

R23: Toxic by inhalation.

R33: Danger of cumulative effects.

R50: Very toxic to aquatic organisms.

R51: Toxic to aquatic organisms.

R52: Harmful to aquatic organisms.

R53: May cause long-term adverse effects in the aquatic environment.

H302: Harmful if swallowed.

H314: Causes severe skin burns and eye damage.

H332: Harmful if inhaled.

H372: Causes damage to organs through prolonged or repeated exposure.

H410: Very toxic to aquatic life with long lasting effects.

The above information is believed to be accurate and represents the best information currently available.

No warranty is expressed or implied by the above information.

We assume no liability resulting from use of the above information.

The end user should conduct their own investigations to determine the suitability of the above information for their particular purpose.
